

AI-TickTacToe A Tic-Tac-Toe game powered by AI, built with Next.js. Challenge an intelligent opponent that uses a minimax algorithm to make optimal moves, offering a fun and engaging experience. Features

Play Tic-Tac-Toe against an AI opponent. Responsive design for seamless gameplay on desktop and mobile. Built with Next.js for fast rendering and optimized performance. Uses next/font to load the Geist font family for a modern look. Simple and intuitive user interface.

Getting Started This project is bootstrapped with create-next-app. Prerequisites

Node.js (version 15 or higher) npm, yarn, pnpm, or bun package manager

Installation

```
Clone the repository:
git clone https://github.com/pd241008/AI-TickTacToe.git
cd AI-TickTacToe
```

Install dependencies:

```
npm install
# or
yarn install
# or
pnpm install
# or
bun install
```

Run the development server:

```
npm run dev
# or
yarn dev
# or
pnpm dev
# or
bun dev
```

Open `bash http://localhost:3000` in your browser to see the result.

You can start editing the page by modifying `app/page.tsx`. The page auto-updates as you edit the file. Usage

Start a Game: Open the application in your browser and click on any cell in the 3x3 grid to make your move (as 'X'). The AI (as 'O') will respond with an optimal move. Game Outcome: The game will display the result (win, lose, or draw) once the game concludes. Restart: Click the restart button to play a new game.

Learn More To learn more about Next.js, check out the following resources:

Next.js Documentation - learn about Next.js features and API. Learn Next.js - an interactive Next.js tutorial. Next.js GitHub Repository - your feedback and

contributions are welcome!

This project uses next/font to automatically optimize and load Geist, a new font family for Vercel. Deploy on Vercel The easiest way to deploy your Next.js app is to use the Vercel Platform from the creators of Next.js. Check out the Next.js deployment documentation for more details. Contributing Contributions are welcome! To contribute:

Fork the repository.

Create a new branch (`git checkout -b feature/your-feature`).

Make your changes and commit (`git commit -m 'Add your feature'`).

Push to the branch (`git push origin feature/your-feature`).

Open a Pull Request.

Please ensure your code follows the project's coding standards and includes appropriate tests. License This project is licensed under the MIT License. See the LICENSE file for details. About AI-TickTacToe is a fun and educational project demonstrating the use of AI in a classic game. Built by pd241008.
