

# 🎨 Color Palette Generator

A responsive **Next.js + TailwindCSS** web application that generates beautiful color palettes instantly.

Users can select a base color and receive a curated palette, with the option to fetch the API directly.

## 🔗 Features

- 🎨 Generate palettes based on a chosen base color
- 🌐 Public API endpoint to get color palettes
- 📱 Fully responsive design
- ⚡ Built with Next.js 14 and TailwindCSS
- ⚡ Fast server-side rendering

## 📁 Project Structure

├── app/ # Next.js App Router pages and components ├── public/ # Static assets ├── styles/ # Global styles ├── package.json # Dependencies and scripts └── README.md # Project documentation

## 🛠️ Tech Stack

- **Next.js 14** – React framework for SSR and routing
- **TailwindCSS** – Utility-first styling
- **TypeScript** – Type safety
- **Vercel** – Deployment platform

## 📦 Installation & Setup

### -1. Clone the repository

```
git clone https://github.com/yourusername/color-palette-generator.git
cd color-palette-generator
```

### -2. Install dependencies

```
npm install
```

### -3. Run the development server

```
npm run dev
```

### -4. Open in browser

```
http://localhost:3000
```

🔗 API Usage The application exposes a simple public API to generate a color palette.

-Endpoint:

```
GET /api/colors?base=#HEXCODE
```

-Example:

```
[  
  "#FF5733",  
  "#FFD700",  
  "#33FF57",  
  "#6A0DAD",  
  "#1E90FF"  
]
```
